Subject Index of Volumes A41 and A42

Acceleration sensor
  acceleration sensor with integrated compensation of temperature effects fabricated by the LIGA process, **42**, 426
Acoustic array sensors
  optimization of beam patterns for acoustic array sensors, **42**, 481
Acoustic sensors
  integrated-optical acoustical sensors, **41**, 93
  mechanical limitations in the performance of integrated acoustic sensors, **42**, 455
Alkane compounds
  optimization and performances of a specifically coated intrinsic optical-fibre sensor for the detection of alkane compounds, **42**, 529
Alpha particles
  new alpha radiation detection systems for environmental surveys, **41**, 85
Anemometer
  a versatile computer controlled measuring system for recording voltage–current characteristics of various resistance sensors, **42**, 612
Angular-position sensor
  a novel smart electrode structure for an accurate capacitive solid-state absolute angular-position sensor, **41**, 212
Anhysteretic processes
  magnetometric sensor based on anhysteretic processes, **42**, 442
Animal monitoring
  a low power multi-sensor interface for injectable micro-processor-based animal monitoring system, **41**, 198
Array transducer
  an integrated multi-element array transducer for ultra-sound imaging, **41**, 167
Arsenic
  technology and devices for hybrid and monolithically integrated optical sensors, **41**, 141
Automotive sensors
  a non-contact strain-gage torque sensor for automative servo-driven steering systems, **41**, 39
  infrared scanning system for obstacle detection in the automotive field, **41**, 47

Beam pattern optimization
  optimization of beam patterns for acoustic array sensors, **42**, 481
Bearings
  electropolymerized films for low friction microactuator bearings, **41**, 300
BGO crystals
  characterization and performance of BGO crystals for positron emission tomography, **42**, 487
Bolometers
  design of a superconducting bolometer for low-power standards in the millimetre wave field, **41**, 114
Bridge resonators
  thermally driven micromechanical bridge resonators, **42**, 680
Bulk-barrier phototransistor
  extremely high-sensitivity bulk-barrier phototransistor applying a polycrystalline emitter, **41**, 88

Calibration
  calibration of three-axial rate gyros without angular velocity standards, **42**, 446
Capacitive sensors
  a new two-dimensional capacitive position transducer, **41**, 29
  extremely miniaturized capacitive movement sensors using new suspension systems, **41**, 129
  a novel smart electrode structure for an accurate capacitive solid-state absolute angular-position sensor, **41**, 212
  on the use of quartz crystal capacitive dependence for measurement of 0-1 ml volumes, **42**, 465
Ceramics
  ceramic pressure sensor based on tantalum thin film, **42**, 435
Charged-particle sensor
  a two-dimensional, high-resolution, charged-particle sensor, **41**, 256
Chemical detection
  chemical detection using pulse narrowing in evanescent wave sensors, **42**, 525
Closed-loop configuration
  pressure microsensor system using a closed-loop configuration, **41**, 78
CMOS
  a fully CMOS-compatible infrared sensor fabricated on SIMOX substrates, **42**, 538
CMOS Hall sensors
  thermal behaviour of CMOS Hall sensors for different operating modes, **42**, 430
CMOS IC process
  determination of thermophysical properties of CMOS IC polysilicon, **41**, 161
CMOS processes
  a 3×3 pyroelectric detector array with improved sensor technology, **41**, 156
  CMOS-compatible integration of thin ferromagnetic films, **42**, 582
Compensation of low frequency noise
  the characterization and compensation through sensor array signal processing techniques of drift and low frequency noise in thick-film semiconductor sensors, **42**, 607
Conduction control
  Hall effect measurements to calculate the conduction control in semiconductor films of SnO_2, **42**, 619
Copolymer films
  a 3×3 pyroelectric detector array with improved sensor technology, **41**, 156

Dew point detector
  hygrometer with fibre optic dew point detector, **42**, 503

Dosimetry
a low background, large solid angle neutron detector for spectroscopy and dosimetry application, **42**, 497
Double-ended tuning fork
dynamic characteristics of a resonating force transducer, **41**, 74
Dynamic variables
optical fiber sensor array for dynamic variables, **42**, 562

Elastic force motor
piezoelectric position sensor for ultrasonic EFM motors, **42**, 661
Elastic waves
a novel torque sensor based on elastic waves generated and detected by piezoelectric thick films, **41**, 33
Electrical energy
modeling and simulation of solid-state transducers: the thermal and electrical energy domain, **41**, 268
Electrical networks
a model for designing an electrical network to increase the speed of pyroelectric sensors, **42**, 402
Electrical switch
fabrication of an HTSC electrical switch, **41**, 70
Electrode structures
particle micromanipulator consisting of two orthogonal channels with travelling-wave electrode structures, **41**, 230
Electrostatic field simulation
modelling of oscillating quartz sensors and related structures, **42**, 643
Energy transfer model
vibrating piezoelectric sensors, **42**, 630
Enrivonmental surveys
new alpha radiation detection systems for environmental surveys, **41**, 85
Epitaxial growth
an integrated silicon colour sensor using selective epitaxial growth, **41**, 123
Etching
reactive ion etching (RIE) techniques for micromachining applications, **41**, 317
Evanescent wave sensors
chemical detection using pulse narrowing in evanescent wave sensors, **42**, 525

Fabrication compatibility
fabrication compatibility of integrated silicon smart physical sensors, **41**, 11
Feature extraction
building the knowledge base of a production system from the raw data of a multi-sensor system, **42**, 599
Ferromagnetic films
CMOS-compatible integration of thin ferromagnetic films, **42**, 582
Fibre optics
a fiber optical voltage sensor prepared by micromachining and wafer bonding, **41**, 334
hygrometer with fibre optic dew point detector, **42**, 503
Fibre-optic position sensor
sensor signal processing using neural networks for a 3-D fibre-optic position sensor, **41**, 102
Fibre-optic probe
performance evaluation of a novel non-contact fibre-optic triggering probe for surface-topography measurement, **41**, 98
Fibre-optic sensor
fibre-optic weigh-in-motion sensor, **41**, 110
fiber-optic sensor for oxygen determination in liquids, **42**, 542
Films
electropolymerized films for low friction microactuator bearings, **41**, 300
new applications of r.f.-sputtered glass films as protection and bonding layers in silicon micromachining, **41**, 338
Fine-line sensor structures
a novel thick-film technique, gravure offset printing, for the realization of fine-line sensor structures, **42**, 593
Flow sensors
an integrated gas flow sensor with high sensitivity, low response time and a pulse-rate output, **41**, 217
simulation of the thermal behaviour of thermal flow sensors by equivalent electrical circuits, **41**, 275
a micromachined flow sensor for liquid and gaseous fluids, **41**, 293
Fluorocarbon polymers
applications of fluorocarbon polymers in micromechanics and micromachining, **41**, 136
Fluxgate sensors
magnetic sensors for industrial and field applications, **42**, 394
Force sensor
optimization of a compact force-sensor/load-cell family, **42**, 362
triple-beam resonant silicon force sensor based on piezoelectric thin films, **42**, 375
an integrated sensor head in silicon for contactless detection of torque and force, **42**, 410
piezoelectric micromovement actuator and force sensor hybridization using a thick-film double-paste printing method, **42**, 421
Force transducer
dynamic characteristics of a resonating force transducer, **41**, 74

Gallium
technology and devices for hybrid and monolithically integrated optical sensors, **41**, 141
Gas flow meters
measurements of the mechanical behaviour of micromachined silicon and silicon-nitride membranes for microphones, pressure sensors and gas flow meters, **41**, 287
Gas flow sensor
an integrated gas flow sensor with high sensitivity, low response time and a pulse-rate output, **41**, 217
Gas-propelled cars
a thick-film pressure transducer for cars propelled by natural gas, **42**, 439
Gas sensors
an intelligent gas sensor, **41**, 192
acoustic wave devices to measure gas flow: comparison between surface acoustic wave (SAW) and shear horizontal acoustic plate mode (SH-APM) oscillators, **42**, 384
modelling aspects of surface acoustic wave gas sensors, **42**, 638
Glass
new applications of r.f.-sputtered glass films as protection and bonding layers in silicon micromachining, **41**, 338

Grating coupler sensors
optical restrictions on the quantitative use of grating coupler sensors (GCS), **42**, 516
Gravure offset printing
a novel thick-film technique, gravure offset printing, for the realization of fine-line sensor structures, **42**, 593

Hall effect measurement
Hall effect measurements to calculate the conduction control in semiconductor films of SnO_2, **42**, 619
Hall sensors
magnetic sensors for industrial and field applications, **42**, 394
high-performance Hall sensors based on III–V heterostructures, **42**, 450
Hearing aid microphones
the merit of using silicon for the development of hearing aid microphones and intraocular pressure sensors, **41**, 223
Heterostructure devices
high-performance Hall sensors based on III–V heterostructures, **42**, 450
High-T_c superconductors
detection of magnetic field by microwave properties of high-T_c superconductors, **41**, 58
fabrication of an HTSC electrical switch, **41**, 70
Hydrodynamic field simulation
modelling of oscillating quartz sensors and related structures, **42**, 643
Hygrometer
hygrometer with fibre optic dew point detector, **42**, 503

Information processing
methods of processing tactile information based on the solution of Helmholtz's equation, **41**, 174
Infrared scanning
infrared scanning system for obstacle detection in the automotive field, **41**, 47
Infrared sensors
application of an infrared sensor for a laser soldering process control, **42**, 511
a fully CMOS-compatible infrared sensor fabricated on SIMOX substrates, **42**, 538
Integrated optical sensors
technology and devices for hybrid and monolithically integrated optical sensors, **41**, 141
Integrated optics
integrated-optical acoustical sensors, **41**, 93
a phase-modulating microphone utilizing integrated optics and micromachining in silicon, **42**, 695
Integrated sensors
fabrication compatibility of integrated silicon smart physical sensors, **41**, 11
integrated 3-D magnetic vector sensor, **42**, 354
low-cost high-sensitivity integrated pressure and temperature sensor, **42**, 398
mechanical limitations in the performance of integrated acoustic sensors, **42**, 455
Intelligent sensors
concepts and focus point for intelligent sensor systems, **41**, 183
an intelligent gas sensor, **41**, 192
intelligent sensor for monitoring freight-waggon working conditions, **42**, 347
Intelligent transducers
hierarchy of structures of intelligent transducers, **42**, 604
Internal combustion engines
a model-based sensor for the adaptation of internal combustion engines, **41**, 207
Intraocular pressure sensors
the merit of using silicon for the development of hearing aid microphones and intraocular pressure sensors, **41**, 223

Knowledge acquisition
building the knowledge base of a production system from the raw data of a multi-sensor system, **42**, 599

Laser ablation deposition
laser ablation deposition as a preparation method for sensor materials, **41**, 145
Laser-induced chemical vapour deposition
laser-induced chemical vapour deposition in piezoresistive pressure sensor fabrication, **41**, 150
Laser soldering
application of an infrared sensor for a laser soldering process control, **42**, 511
LIGA process
acceleration sensor with integrated compensation of temperature effects fabricated by the LIGA process, **42**, 426
Light modulator arrays
line-addressable torsional micromirrors for light modulator arrays, **41**, 324
Liquid systems
ultrasonic sensor system for characterization of liquid systems, **42**, 476
Load cell
optimization of a compact force-sensor/load-cell family, **42**, 362
Love waves
comparison of the mass sensitivity of Love and Rayleigh waves in a three-layer system, **42**, 472
Low frequency noise
the characterization and compensation through sensor array signal processing techniques of drift and low frequency noise in thick-film semiconductor sensors, **42**, 607

Machine-learning process
building the knowledge base of a production system from the raw data of a multi-sensor system, **42**, 599
Magnetic-field sensors
detection of magnetic field by microwave properties of high-T_c superconductors, **41**, 58
integrated resonant magnetic-field sensor, **41**, 66
magnetic sensors for industrial and field applications, **42**, 394
magnetometric sensor based on anhysteretic processes, **42**, 442
Magnetic fusion
sensor for plasma-density profile measurement in magnetic fusion machine, **41**, 53
Magnetic vector sensors
integrated 3-D magnetic vector sensor, **42**, 354
Magnetoresistive sensors
magnetic sensors for industrial and field applications, **42**, 394
Mass sensitivity
comparison of the mass sensitivity of Love and Rayleigh waves in a three-layer system, **42**, 472

Mechanical analysis
mechanical analysis of polycrystalline and single-crystalline silicon microstructures, **42**, 672
Mechanical behaviour
measurements of the mechanical behaviour of micro-machined silicon and silicon-nitride membranes for microphones, pressure sensors and gas flow meters, **41**, 287
Mechanical properties of metals
MIS sensor for investigation of mechanical properties of metals, **42**, 358
Membranes
thermal modeling of multilayer membranes for sensor applications, **41**, 260
Microactuator bearings
electropolymerized films for low friction microactuator bearings, **41**, 300
Micromachined flow sensor
a micromachined flow sensor for liquid and gaseous fluids, **41**, 293
Micromachined optical planes
micromachined optical planes and reflectors in silicon, **41**, 330
Micromachined silicon
measurements of the mechanical behaviour of micro-machined silicon and silicon-nitride membranes for microphones, pressure sensors and gas flow meters, **41**, 287
Micromachining
PSG layers for surface micromachining, **41**, 304
amorphous silicon carbide and its application in silicon micromachining, **41**, 310
reactive ion etching (RIE) techniques for micromachining applications, **41**, 317
a fiber optical voltage sensor prepared by micromachining and wafer bonding, **41**, 334
new applications of r.f.-sputtered glass films as protection and bonding layers in silicon micromachining, **41**, 338
an integrated sensor head in silicon for contactless detection of torque and force, **42**, 410
a phase-modulating microphone utilizing integrated optics and micromachining in silicon, **42**, 695
Micromechanics
tandem-photolithography process for thin-film sensors and micromechanics, **42**, 569
thermally driven micromechanical bridge resonators, **42**, 680
Micromirrors
line-addressable torsional micromirrors for light modulator arrays, **41**, 324
Microphones
integrated-optical acoustical sensors, **41**, 93
measurements of the mechanical behaviour of micro-machined silicon and silicon-nitride membranes for microphones, pressure sensors and gas flow meters, **41**, 287
a phase-modulating microphone utilizing integrated optics and micromachining in silicon, **42**, 695
Microsensors
thermoelectric radiation microsensors, **42**, 493
Microsystem modelling
modelling of oscillating quartz sensors and related structures, **42**, 643
Microtransducers
problem-oriented modeling of microtransducers: state of the art and future challenges, **41**, 279
Microwave reflectometry
sensor for plasma-density profile measurement in magnetic fusion machine, **41**, 53
Microwaves
detection of magnetic field by microwave properties of high-T_c superconductors, **41**, 58
Microweighing
vibrating piezoelectric sensors, **42**, 630
Miniaturization
extremely miniaturized capacitive movement sensors using new suspension systems, **41**, 129
MIS sensors
MIS sensor for investigation of mechanical properties of metals, **42**, 358
Model
a model-based sensor for the adaptation of internal combustion engines, **41**, 207
applications of a model for silicon resonant sensors, **41**, 251
Modeling
thermal modeling of multilayer membranes for sensor applications, **41**, 260
modeling and simulation of solid-state transducers: the thermal and electrical energy domain, **41**, 268
problem-oriented modeling of microtransducers: state of the art and future challenges, **41**, 279
Multi-purpose sensors
a multi-purpose sensor based on surface plasmon polariton resonance in a Schottky structure, **42**, 547
Multi-sensors
a low power multi-sensor interface for injectable micro-processor-based animal monitoring system, **41**, 198
Multi-sensor systems
building the knowledge base of a production system from the raw data of a multi-sensor system, **42**, 599

Neural networks
sensor signal processing using neural networks for a 3-D fibre-optic position sensor, **41**, 102
Neutron detectors
a low background, large solid angle neutron detector for spectroscopy and dosimetry application, **42**, 497
Noise analysis
the characterization and compensation through sensor array signal processing techniques of drift and low frequency noise in thick-film semiconductor sensors, **42**, 607
Non-contact measurement
performance evaluation of a novel non-contact fibre-optic triggering probe for surface-topography measurement, **41**, 98
Nuclear radiation detectors
shallow p^+n junction silicon nuclear radiation detectors, **42**, 558

Object location
PVDF ultrasonic sensors for location of small objects, **42**, 406
Optical-fibre sensors
optimization and performances of a specifically coated intrinsic optical-fibre sensor for the detection of alkane compounds, **42**, 529
optical fiber sensor array for dynamic variables, **42**, 562
Optical pressure sensors
new results on optical pressure sensors based on semiconductor quantum wells, **42**, 654

Oscillating structures
modelling of oscillating quartz sensors and related structures, **42**, 643
Oxygen determination
fiber optic sensor for oxygen determination in liquids, **42**, 542

Particle micromanipulator
particle micromanipulator consisting of two orthogonal channels with travelling-wave electrode structures, **41**, 230
Photodetectors
position-sensitive photodetector with rectifying voltage–current characteristics, **42**, 508
Photolithography
tandem-photolithography process for thin-film sensors and micromechanics, **42**, 569
Piezoelectric actuator
piezoelectric micromovement actuator and force sensor hybridization using a thick-film double-paste printing method, **42**, 421
Piezoelectric sensors
vibrating piezoelectric sensors, **42**, 630
piezoelectric position sensor for ultrasonic EFM motors, **42**, 661
Piezoelectric thin films
triple-beam resonant silicon force sensor based on piezoelectric thin films, **42**, 375
Piezoresistive pressure sensors
laser-induced chemical vapour deposition in piezoresistive pressure sensor fabrication, **41**, 150
ceramic pressure sensor based on tantalum thin film, **42**, 435
sputtered silicon thin films for piezoresistive pressure microsensors, **42**, 685
Piezoresistive sensors
self-compensating piezoresistive pressure sensor, **42**, 368
a very low-cost pressure sensor with extremely high sensitivity, **42**, 417
a novel model for the temperature characteristic of a thick-film piezoresistive sensor, **42**, 460
Plasma density measurement
sensor for plasma-density profile measurement in magnetic fusion machine, **41**, 53
PLZT
PLZT pyroelectric radiant energy sensor, **42**, 535
Polycrystalline silicon
extremely high-sensitivity bulk-barrier phototransistor applying a polycrystalline emitter, **41**, 88
Polysilicon
determination of thermophysical properties of CMOS IC polysilicon, **41**, 161
Position transducer
a new two-dimensional capacitive position transducer, **41**, 29
Positron emission topography
characterization and performance of BGO crystals for positron emission tomography, **42**, 487
Power standards
design of a superconducting bolometer for low-power standards in the millimetre wave field, **41**, 114
Pressure microsensors
pressure microsensor system using a closed-loop configuration, **41**, 78
sputtered silicon thin films for piezoresistive pressure microsensors, **42**, 685
Pressure sensors
the merit of using silicon for the development of hearing aid microphones and intraocular pressure sensors, **41**, 223
quantum-well pressure sensors, **41**, 247
measurements of the mechanical behaviour of micromachined silicon and silicon-nitride membranes for microphones, pressure sensors and gas flow meters, **41**, 287
self-compensating piezoresistive pressure sensor, **42**, 368
low-cost high-sensitivity integrated pressure and temperature sensor, **42**, 398
a very low-cost pressure sensor with extremely high sensitivity, **42**, 417
new results on optical pressure sensors based on semiconductor quantum wells, **42**, 654
Pressure transducers
design and fabrication of resonating AT-quartz diaphragms as pressure transducers, **42**, 389
a thick-film pressure transducer for cars propelled by natural gas, **42**, 439
PSG layers
PSG layers for surface micromachining, **41**, 304
PVDF
PVDF ultrasonic sensors for location of small objects, **42**, 406
Pyroelectric array
a 3×3 pyroelectric detector array with improved sensor technology, **41**, 156
Pyroelectric image sensors
application of VDF/TrFE copolymer for pyroelectric image sensors, **42**, 585
Pyroelectric sensors
a model for designing an electrical network to increase the speed of pyroelectric sensors, **42**, 402
PLZT pyroelectric radiant energy sensor, **42**, 535
Pyroelectric sensor arrays
the optimization of low cost integrated pyroelectric sensor arrays, **42**, 553
PZT piezoelectric thick films
a novel torque sensor based on elastic waves generated and detected by piezoelectric thick films, **41**, 33

Quantum wells
quantum-well pressure sensors, **41**, 247
new results on optical pressure sensors based on semiconductor quantum wells, **42**, 654
Quartz crystals
on the use of quartz crystal capacitive dependence for measurement of 0-1 ml volumes, **42**, 465
Quartz resonators
design and fabrication of resonating AT-quartz diaphragms as pressure transducers, **42**, 389
Quartz sensors
modelling of oscillating quartz sensors and related structures, **42**, 643

Radiant energy sensor
PLZT pyroelectric radiant energy sensor, **42**, 535
Radon
new alpha radiation detection systems for environmental surveys, **41**, 85
Railway-waggon monitor
intelligent sensor for monitoring freight-waggon working conditions, **42**, 347

Rate gyros
calibration of three-axial rate gyros without angular velocity standards, **42**, 446
Rayleigh waves
comparison of the mass sensitivity of Love and Rayleigh waves in a three-layer system, **42**, 472
Rectifying characteristics
position-sensitive photodetector with rectifying voltage–current characteristics, **42**, 508
Reflectors
micromachined optical planes and reflectors in silicon, **41**, 330
Resistance sensors
a versatile computer controlled measuring system for recording voltage–current characteristics of various resistance sensors, **42**, 612
Resolution of noise
the characterization and compensation through sensor array signal processing techniques of drift and low frequency noise in thick-film semiconductor sensors, **42**, 607
Resonance
a multi-purpose sensor based on surface plasmon polariton resonance in a Schottky structure, **42**, 547
Resonant sensors
applications of a model for silicon resonant sensors, **41**, 251
Rule-based systems
building the knowledge base of a production system from the raw data of a multi-sensor system, **42**, 599

SAW devices
acoustic wave devices to measure gas flow: comparison between surface acoustic wave (SAW) and shear horizontal acoustic plate mode (SH-APM) oscillators, **42**, 384
modelling aspects of surface acoustic wave gas sensors, **42**, 638
Schottky structure
a multi-purpose sensor based on surface plasmon polariton resonance in a Schottky structure, **42**, 547
Semiconductor sensor
heat-flux sensor, **42**, 381
Semiconductor sensor preparation
Hall effect measurements to calculate the conduction control in semiconductor films of SnO_2, **42**, 619
Sensor applications
thermal modeling of multilayer membranes for sensor applications, **41**, 260
Sensor arrays
the optimization of low cost integrated pyroelectric sensor arrays, **42**, 553
Sensor drift
the characterization and compensation through sensor array signal processing techniques of drift and low frequency noise in thick-film semiconductor sensors, **42**, 607
Sensor materials
laser ablation deposition as a preparation method for sensor materials, **41**, 145
Sensor operation
thermodynamic stability of the operation of sensors, **42**, 622
Sensor systems
ultrasonic sensor system for characterization of liquid systems, **42**, 476
Sensor system modelling
modelling aspects of surface acoustic wave gas sensors, **42**, 638
SH-APM oscillators
acoustic wave devices to measure gas flow: comparison between surface acoustic wave (SAW) and shear horizontal acoustic plate mode (SH-APM) oscillators, **42**, 384
Silicon
fabrication compatibility of integrated silicon smart physical sensors, **41**, 11
the merit of using silicon for the development of hearing aid microphones and intraocular pressure sensors, **41**, 223
applications of a model for silicon resonant sensors, **41**, 251
measurements of the mechanical behaviour of micromachined silicon and silicon-nitride membranes for microphones, pressure sensors and gas flow meters, **41**, 287
micromachined optical planes and reflectors in silicon, **41**, 330
new applications of r.f.-sputtered glass films as protection and bonding layers in silicon micromachining, **41**, 338
triple-beam resonant silicon force sensor based on piezoelectric thin films, **42**, 375
an integrated sensor head in silicon for contactless detection of torque and force, **42**, 410
shallow p^+n junction silicon nuclear radiation detectors, **42**, 558
novel extra-accurate method for two-sided alignment on silicon wafers, **42**, 573
thermally driven micromechanical bridge resonators, **42**, 680
sputtered silicon thin films for piezoresistive pressure microsensors, **42**, 685
preparation and characterization of ultrathin crystalline silicon membranes, **42**, 689
a phase-modulating microphone utilizing integrated optics and micromachining in silicon, **42**, 695
Silicon carbide
amorphous silicon carbide and its application in silicon micromachining, **41**, 310
Silicon colour sensors
an integrated silicon colour sensor using selective epitaxial growth, **41**, 123
Silicon membranes
reduction of heat loss of silicon membranes by the use of trench-etching techniques, **42**, 578
Silicon micromachining
mechanical limitations in the performance of integrated acoustic sensors, **42**, 455
Silicon microstructures
mechanical analysis of polycrystalline and single-crystalline silicon microstructures, **42**, 672
Silicon sensors
quo vadis silicon sensors?, **41**, 1
Silicon–silicon nitride membrane
a silicon–silicon nitride membrane fabrication process for smart thermal sensors, **42**, 666
SIMOX substrates
a fully CMOS-compatible infrared sensor fabricated on SIMOX substrates, **42**, 538

Simulation
modeling and simulation of solid-state transducers: the thermal and electrical energy domain, **41**, 268
simulation of the thermal behaviour of thermal flow sensors by equivalent electrical circuits, **41**, 275
Skin characterization
a micro thermal diffusion sensor for non-invasive skin characterization, **41**, 240
Smart electrode structure
a novel smart electrode structure for an accurate capacitive solid-state absolute angular-position sensor, **41**, 212
Smart sensors
fabrication compatibility of integrated silicon smart physical sensors, **41**, 11
Smart thermal sensors
a silicon–silicon nitride membrane fabrication process for smart thermal sensors, **42**, 666
Solid-state transducers
modeling and simulation of solid-state transducers: the thermal and electrical energy domain, **41**, 268
Spectroscopy
a low background, large solid angle neutron detector for spectroscopy and dosimetry application, **42**, 497
Stability of equilibrium
thermodynamic stability of the operation of sensors, **42**, 622
Strain gages
a non-contact strain-gage torque sensor for automative servo-driven steering systems, **41**, 39
Surface micromachining
PSG layers for surface micromachining, **41**, 304
Surface-topography measurement
performance evaluation of a novel non-contact fibre-optic triggering probe for surface-topography measurement, **41**, 98
Suspension systems
extremely miniaturized capacitive movement sensors using new suspension systems, **41**, 129

Tactile pattern recognition
methods of processing tactile information based on the solution of Helmholtz's equation, **41**, 174
Tantalum
ceramic pressure sensor based on tantalum thin film, **42**, 435
Temperature sensors
low-cost high-sensitivity integrated pressure and temperature sensor, **42**, 398
a versatile computer controlled measuring system for recording voltage–current characteristics of various resistance sensors, **42**, 612
Thermal behaviour
simulation of the thermal behaviour of thermal flow sensors by equivalent electrical circuits, **41**, 275
Thermal diffusion sensor
a micro thermal diffusion sensor for non-invasive skin characterization, **41**, 240
Thermal energy
modeling and simulation of solid-state transducers: the thermal and electrical energy domain, **41**, 268
Thermal flow sensors
simulation of the thermal behaviour of thermal flow sensors by equivalent electrical circuits, **41**, 275
Thermalized crystals
characterization and performance of BGO crystals for positron emission tomography, **42**, 487
Thermistors
a versatile computer controlled measuring system for recording voltage–current characteristics of various resistance sensors, **42**, 612
Thermodynamic measuring process
thermodynamic stability of the operation of sensors, **42**, 622
Thermoelectric radiation
thermoelectric radiation microsensors, **42**, 493
Thick-film hybrids
piezoelectric micromovement actuator and force sensor hybridization using a thick-film double-paste printing method, **42**, 421
Thick films
a thick-film pressure transducer for cars propelled by natural gas, **42**, 439
Thick-film sensors
a novel model for the temperature characteristic of a thick-film piezoresistive sensor, **42**, 460
Thin-film sensors
tandem-photolithography process for thin-film sensors and micromechanics, **42**, 569
Thin-film technique
a novel thick-film technique, gravure offset printing, for the realization of fine-line sensor structures, **42**, 593
Tin(IV) oxide films
Hall effect measurements to calculate the conduction control in semiconductor films of SnO_2, **42**, 619
Torque sensors
a novel torque sensor based on elastic waves generated and detected by piezoelectric thick films, **41**, 33
a non-contact strain-gage torque sensor for automative servo-driven steering systems, **41**, 39
an integrated sensor head in silicon for contactless detection of torque and force, **42**, 410
Torsional micromirrors
line-addressable torsional micromirrors for light modulator arrays, **41**, 324
Transducer structure hierarchy
hierarchy of structures of intelligent transducers, **42**, 604
Transient states
thermodynamic stability of the operation of sensors, **42**, 622
Travelling-wave electrode structures
particle micromanipulator consisting of two orthogonal channels with travelling-wave electrode structures, **41**, 230
Trench-etching techniques
reduction of heat loss of silicon membranes by the use of trench-etching techniques, **42**, 578
Trifluoroethylene
application of VDF/TrFE copolymer for pyroelectric image sensors, **42**, 585
Tunable gas sensors
vibrating piezoelectric sensors, **42**, 630

Ultrasonic sensors
PVDF ultrasonic sensors for location of small objects, **42**, 406

ultrasonic sensor system for characterization of liquid systems, **42**, 476
Ultrasound imaging
an integrated multi-element array transducer for ultrasound imaging, **41**, 167
Ultrathin membranes
preparation and characterization of ultrathin crystalline silicon membranes, **42**, 689

Vibrating piezoelectric sensors
vibrating piezoelectric sensors, **42**, 630
Vinylidene fluoride
application of VDF/TrFE copolymer for pyroelectric image sensors, **42**, 585
Voltage–current characteristics
a versatile computer controlled measuring system for recording voltage–current characteristics of various resistance sensors, **42**, 612
Volume measurement
on the use of quartz crystal capacitive dependence for measurement of 0-1 ml volumes, **42**, 465

Wafer alignment
novel extra-accurate method for two-sided alignment on silicon wafers, **42**, 573
Wafer bonding
a fiber optical voltage sensor prepared by micromachining and wafer bonding, **41**, 334
Weight-in-motion sensor
fibre-optic weigh-in-motion sensor, **41**, 110
